DETAILED ACTION

Election/Restrictions

The election of species requirement, part of paper No. 3, has been withdrawn.

Note the restriction requirement is maintained.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 34 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 34 directly conflicts independent claim 26 from which it depends.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in-

(1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have

the effect under this subsection of a national application published under section 122(b) only if the international application designating the United States was published under Article 21(2)(a) of such treaty in the English language; or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that a patent shall not be deemed filed in the United States for the purposes of this subsection based on the filing of an international application filed under the treaty defined in section 351(a).

Claims 26-27, 31-34, 37 are rejected under 35 U.S.C. 102(b) as being anticipated by Fogarty et al (5,769,882).

Referring to all figures specifically figures 13-15, Fogarty et al teaches a method for repairing an aorta proximate the renal arteries using a graft assembly including first and second elements. The first element, shown in figure 13, having a sealing stent 122 disposed superior to a bifurcation junction and wherein the bifurcation junction of the first element is supported by the point of the aortic bifurcation. See figure 14. The method further including attaching a second element including element P and 150 subsequent to actuating elements 124, 126; and fixating the second element 150 superior to the renal arteries.

Regarding claim 31, figure 14 does not show the proportions of first element 120 as shown in figure 13. It is the Examiner's position that the element 120 would be "free floating".

Regarding claim 37, the second element of Fogarty et al is fully capable of buckling.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 30 is rejected under 35 U.S.C. 103(a) as being unpatentable over Fogarty et al (5,769,882) in view of Leonhardt et al (5,713,917).

Fogarty et al teaches the apparatus/method as described in the rejection above. However, Fogarty et al is silent regarding using a bracing wire. Leonhardt et al teaches a bifurcating stent-graft which uses bracing wires 70C, 72C, 68C which connects adjacent stents. It would have been obvious to one having ordinary skill in the art to have utilized the bracing wires of Leonhardt et al with the stent-graft of Fogarty et al to maintain desired spacing between stents.

Claims 35-36 are rejected under 35 U.S.C. 103(a) as being unpatentable over Fogarty et al (5,769,882) in view of Lazarus (5,104,399).

Fogarty et al teaches the apparatus/method as described in the rejection above. However, Fogarty et al is silent regarding using hooks. Referring to figure 2, Lazarus teaches hooks on a stent-graft. It would have been obvious to one having ordinary skill in the art to have utilized the hooks and/or attached stent of Lazarus with elements P

and/or 140 of Fogarty to provide better anchoring of the graft or such that elements 140 could be eliminated.

Response to Arguments

Applicant's arguments have been considered but are moot in view of the new ground(s) of rejection. The amendments made to claim 26 and the addition of new claims 30-37 necessitated new grounds of rejection.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Bruce E Snow whose telephone number is (703) 308-3255. The examiner can normally be reached on Mon-Thurs.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Corrine McDermott can be reached on (703)308-2111. The fax phone numbers for the organization where this application or proceeding is assigned are (703) 305-3590 for regular communications and . for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-0858.
